

## Sinclair Marks It's 60<sup>th</sup> Anniversary Milestone

June 2011-Aurora ON

In June 2011 Sinclair celebrated its 60<sup>th</sup> anniversary.

Sinclair Technologies was established as Sinclair Radio Laboratories Ltd. in 1951 by Dr. George Sinclair, the company quickly grew to become one of the world's leading antenna and RF equipment manufacturer. Over the years Sinclair products have been used at significant places like the CN Tower and the Empire State Building. Sinclair has also designed products for high profile projects like the AVRO Arrow, Alouette I Satellite, and Gemini Spacecraft. In Jan 2011 Sinclair became a part of Norsat International.

At Sinclair we are committed to exploring new market opportunities and developing new products that will meet the needs of our customers in the future. With the continued support of our employees, customers and suppliers, we have great confidence that we will remain the "Industry Standard for Quality and Innovation".

To mark this milestone Sinclair hosted a special celebration at the Aurora plant followed by a Toronto Harbor Dinner Cruise. The event was attended by over 145 guests that included the Sinclair family, employees, customers, suppliers and other guests.

To commemorate the occasion daughters of Dr. Sinclair cut the anniversary cakes and every guest received a special gift featuring the 60th anniversary logo specially designed for the occasion by Valerie Sinclair.
