

INNOVATIVE COMMUNICATION SOLUTIONS

Antenna & RF Conditioning Provider for the Utilities Industry

SINCLAIR[®]
Superior then, Superior now.

A Division Of

Norsat
International Inc.

Sinclair Technologies

Sinclair Technologies is a global leader in the manufacture and distribution of high-quality fixed and mobile antennas, filters, receiver multicouplers, transmitter combiners and related components.

The Sinclair Advantage

For over 60 years, Sinclair Technologies has provided industry leading antenna and RF conditioning products, engineered systems and project specific design.

Sinclair Products

Sinclair Technologies is Norsat International's RF Antenna and Conditioning Products Solutions division. Sinclair is a designer and manufacturer of antennas and RF conditioning products such as filters, receiver multicouplers, combiners, tower top amplifiers and accessories. Sinclair's Systems Engineering Group offers customers unique and project specific designs.

Sinclair products are available from low band into the GHz ranges. Sinclair's industry leading designs set the standard for quality, innovation and durability.

Utilities Market

FLEXIBLE, HIGH QUALITY, RUGGED

Sinclair Technologies has been providing major hydro, electric and water companies with a full line of antennas, combiners and filter systems worldwide. Sinclair products offer innovative, cost effective and robust solutions for your communications systems.

PRODUCT FEATURES

- › Frequency bands from low to high
- › Custom systems design
- › Rugged design

PRODUCT BENEFITS

- › Flexible
- › Designs tailored to your company's needs
- › Dependable performance

MARKETS SERVED

- › Major Utilities
- › Electric Cooperatives
- › Hydro and Water Companies
- › Oil and Gas
